LIBRARY COMPUTERS AND LAPTOPS

UT SOUTHWESTERN MEDICAL CENTER
LIBRARY

Both the South Campus (main) and North Campus Branch Libraries offer computer workstations for affiliated clients. All general Library computers have CD/DVD burners and are networked to black and white and color laser printers. Some computers are also connected to color scanners. Available software applications include:

- Adobe Acrobat Reader and Photoshop
- Microsoft Office 2003/2007
- Microsoft OneNote
- EndNote
- MATLAB
- SAS
- SPSS

The computers are secured so that you may not save work to the hard drive. You will need to bring your own jump/flash drives or writable discs to save your work.

Designated computers and printers are available in each Library specifically for students. (These machines are provided and maintained by Student Services.) You can log into these computers with your student account to print at a discounted rate ($0.05 for black and white, $0.25 for color). Go to the Cashier's Office in the basement of the McDermott Administration Building (B Building) to add money to this account. Your account will be charged for student print jobs even if problems occurred. For assistance in obtaining a refund, please email or call 214-648-7600 (the IR Call Center).

South Campus (main) Library

Most of the computers at the South Campus (main) Library are on the Main Floor, although there are a few computers on the other floors near the stairs. The 28 student computers are against the back wall on the Main Floor. Please ask at the Information Desk to be directed to computers with SAS or SPSS or to check out headphones.

You may also check out laptops for use within the Library from the Information Desk. Macs and PCs are available.

North Campus Branch Library

The computers at the North Campus Branch Library are near the entrance. There are three student computers and a printer located on the back row.
