Browser Configurations

Your computer browser must be configured correctly to connect to the internet on campus. To test your connection to the internet, go to the following address:  [http://utsystem.edu/](http://utsystem.edu/).

If you continue to have problems after trying the options below, please contact the Service Desk at 214-648-7600 or e-mail them at [servicedesk@utsouthwestern.edu](mailto:servicedesk@utsouthwestern.edu)

Internet Explorer Configurations:

- **Option 1**
- **Option 2**

Mac OS 10.6 and above Configuration

- **Safari**
  
  NOTE: If you are using Firefox, use the Safari configuration above as this does include steps for the Firefox browser as well

Internet Explorer - Option 1:

1. Open Internet Explorer
2. Choose "Tools", "Internet Options"
3. Choose the "Connections" tab and then "LAN Settings"

4. Make sure "Automatically detect settings" is checked.
5. Choose "OK" and then "OK" again and close the browser.
6. Re-open the browser and see if you can connect to the site above.

Internet Explorer - Option 2:

1. Open Internet Explorer
2. Choose "Tools", "Internet Options"
3. Choose the "Connections" tab and then "LAN Settings"

4. Uncheck "Automatically detect settings" and check the box for "Use automatic configuration script" and put the following in the "Address box" - http://proxy.swmed.edu/proxy.pac
5. Choose "OK" and then "OK" again and close the browser.
6. Re-open the browser and see if you can connect to the internet.
