

FIND FULL TEXT USING ENDNOTE

EndNote's **Find Full Text** feature enables searching of UT Southwestern collections from within the EndNote interface. After selecting records in an EndNote Library, a user may click "Find Full Text" to search for articles and automatically attach PDFs to data records.

Please follow these instructions to activate:

1. From the EndNote Menu Bar, click **Edit, Preferences**, then **Find Full Text**.
2. Copy and paste the URLs below into the two blank boxes. Click **Apply** and **OK**.

(Proxy URLs)

<https://linksource.ebsco.com/linking.aspx>

<https://login.foyer.swmed.edu/login?url=>

3. From the **Preferences** menu, click **URLS & Links** and verify the following URLs are populating these fields:

ISI Base URL field:

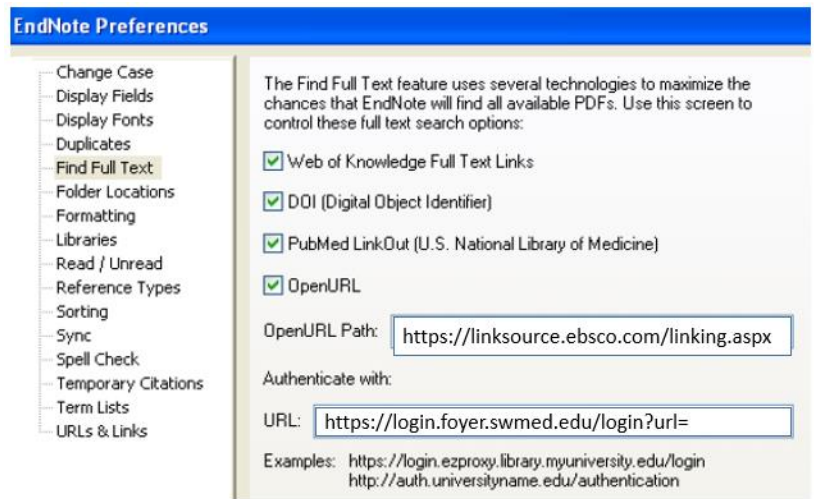

<http://gateway.isiknowledge.com/gateway/Gateway.cgi>

OpenURL Arguments field:

?sid=ISI:WoS&aufirst=AUFIRST&aulast=AULAST&issn=ISSN&isbn=ISBN&atitle=ATITLE&title=TITLE
&volume=VOLUME&issue=ISSUE&date=DATE&spage= SPAGE&epag=EPAGE

4. Start using **Find Full Text**.

- In an open library, select a reference data record. Choose up to 50 references at a time.
- Right-click and select **Find Full Text**: The Ezproxy login in Window appears: **Please enter your UT Southwestern login and password**.
- Click on **Continue**, and then on **OK** in the EndNote disclaimer window. The search begins and PDF(s) are attached to the citation(s). A paperclip icon will appear next to records for which EndNote has found full-text articles. Searching progress displays on the left sidebar.

Disclaimer

This function is **not 100%** coverage of full text. Reasons for limitation may include absence of UT Southwestern or EndNote license for requested articles or publishers or vendors have not agreed to comply with EndNote technological requirements. You may choose to search again for articles not found to ensure full retrieval and/or utilize the UTSW Interlibrary Loan Service to order copies of items outside our collections.
