

EXPORTING CITATIONS FROM OVID

1. Search for citations
2. Click on Display
3. Select citations to Export: All, range box, individual [check box]
4. Select Fields to Display / Include URL check box

Automatic Download: Export to **EndNote** When an EndNote library is open, the selected citations will automatically download into the library.

When library is not available: Export to **RIS** format

- Save the file. Remember where the file is saved.
- When the library is available, open the library.
- Click on File > Import > File
- Import File Window > Choose Import File. Next, Select Import Option: From pull down arrow select Other Filters > **Medline (OvidSP)** > Import
