

Selected UT Southwestern Library journal subscriptions provide discounted Article Processing Charges (APCs) for authors. Publishers use discounted APCs to encourage open access (OA) publishing.

Publishers do not apply discounts automatically. The corresponding UT Southwestern author should inform the publisher of the Library benefit when submitting articles.

This list is as comprehensive as possible. As we learn about additional APC discounts, we will continue to update this list.

ACS Publications (American Chemical Society)

The Library's All Publications ACS subscription guarantees an APC discount for UTSW authors in various ACS publications. Additionally, individual ACS members may also be eligible for discounts.

More information: <https://pubs.acs.org/page/4authors/authorchoice/index.html>

Biochemical Society (Portland Press)

All articles accepted for publication from corresponding UTSW authors will be automatically published in the following journals as open access with no separate article processing charges:

- *Biochemical Journal*
- *Biochemical Society Transactions*
- *Bioscience Reports*
- *Clinical Science*
- *Emerging Topics in Life Sciences*
- *Essays in Biochemistry*
- *Neuronal Signaling*

Cost avoidance of APC charges results from Library funding of the publisher's transformative "read and publish" combined subscription model.

More information: https://portlandpress.com/pages/open_access_policy

BMJ Case Reports

Note: This is not an open access program. A benefit of the Library's subscription to this journal is cost avoidance for author submission of case reports.

Because of the Library's Institutional Fellowship, corresponding UTSW authors do not need to pay the Individual Fellowship Fee to publish in this journal. You must include the Institutional Fellowship code when submitting case studies for publication.

The Institutional Fellowship code may be obtained by visiting the Library's [Ejournals A to Z page](#) (authorized UTSW users only).

Cambridge University Press

Effective 2021, all articles accepted for publication from corresponding UTSW authors will be automatically published as open access with no separate article processing charges. Cost avoidance of APC charges results from Library funding of the publisher's new transformative "read and publish" combined subscription model.

More information: <https://www.cambridge.org/core/services/open-access-policies/read-and-publish-agreements/oa-agreement-university-of-texas-system>

Proceedings of the National Academy of Sciences (PNAS)

Because of UT Southwestern Library's site license, corresponding UTSW authors will receive a discounted *open access fee* to make their articles free immediately upon publication. All other articles become free online after six months.

More information: <https://www.pnas.org/page/subscriptions/open-access>

Society for Endocrinology (Bioscientifica)

The Library's subscriptions guarantee an APC discount for UTSW authors. Check each individual journal's "publication charges" page for specific discounts.
