Biographical/Historical: George Justice Race (1926-2013) was born in Everman, Texas on

March 2, 1926. He attended Texas Wesleyan College for one year and Baylor University for a second year. He then entered medical school at Southwestern Medical College. After graduating in 1947, Dr. Race interned in pathology at Duke University followed by an internship in general surgery at Boston City Hospital. He served in the Army during World War II and later in the Air Force as a flight surgeon during the Korean War. In addition to his medical degree, Dr. Race earned a Master of Science in Public Health from the University of North Carolina in 1953 and a Ph.D. in anatomy and microbiology at Baylor University in 1969. In 1955, Dr. Race joined the UT Southwestern Pathology faculty, where he remained until his retirement in 1994. In 1959, he was named Chief of Pathology at Baylor University Medical Center. He served as UT Southwestern's first Associate Dean for Continuing Medical Education and was instrumental in starting Baylor University Medical Center's A. Webb Roberts Center for Continuing Education.

Dr. Race was the editor of two history books about UT Southwestern Medical Center. The first is *UT Southwestern: Commemorating the First Half-Century*, published by the Student and Alumni Affairs Office in 1998. The book consists primarily of photographs with explanatory captions, illustrating the history of the school from its founding in 1943 up through 1997. The second book is *Selected Recollections of the University of Texas Southwestern Medical School, Dallas, Texas*, published in 1997 by the Student and Alumni Affairs Office. The second book is a collection of essays, most by faculty members, recounting the early years of the medical school. Dr. Race also assembled history displays which he would put on exhibit during UT Southwestern Medical School alumni events. Dr. Race passed away on December 17, 2013.

Scope and Contents: The collection consists of records from 1931-2003 that George J. Race collected for use as research and reference materials for the two history books about UT Southwestern that he edited: *Selected Recollections of the University of Texas Southwestern Medical School, Dallas, Texas* and *UT Southwestern: Commemorating the First Fifty Years*. The bulk of the records are ephemera, minutes, publications, and correspondence that document the history of UT Southwestern, including the beginning of Southwestern Medical School. A few records document Baylor University Medical Center and the medical history of Dallas in general. Many of the records were used as display materials in history exhibits Dr. Race set up for alumni events. Also included are digital transcripts of interviews conducted by Bob Dietz that Dr. Race used in his research.
